RI TRANSPARENCY REPORT

2019

Trecento

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

A very small part of our listed equity investment fund is invested in emerging countries like China and South Korea or frontier markets like Jordan. OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

When Trecento AM selects an external asset manager, we try to ensure that the selected companies incorporate ESG criterias into their investment process. As we invest through pooled funds, there is no formal appointment. We conduct annual reviews of the ESG policy of the external asset managers that were selected, through meetings with the ESG or SRI teams of the asset managers.

External managers' funds in which we have invested currently are signatories of Principles for Responsible Investments (PRI), Carbon Disclosure Project (CDP), CDP Water Disclosure, Forest Footprint Disclosure Project (FFDP) or members of several working groups or commissions tied to responsible investment implementation.

OO 11.5

For your externally managed pooled funds, describe any mechanisms in place to set expectations as part of the appointment or commitment process.

When Trecento AM selects an external asset manager, we try to ensure that the selected companies incorporate ESG criterias into their investment process. On top of that, we make sure that their ESG policy is truly implemented, on the long run, and if the external asset manager fails to comply with its ESG policy, we liquidate our position and chooses another (better) external asset manager.

PE 03.4 Explain why your organisation does not fund-raise.

The private equity investment that we manage are part of French Employee Savings Plans that are funded by employers and employees, usually on an annual basis.

The management team then decides how to manage this new AUM, depending on the strategy of the funds that were selected by the employees (who are the owner of the shares of the funds). We therefore do not have an active fundraising activity.
